

July 2

Alice: heys

Mark: hello =)

Alice: serge hasn't replied my text..

so..he might not be here?

lol..

shahanah just got off work so she'll be try to meet wiht us once she gets home

Mark: I know he said he was busy this week, so its possible =)

all right

working on the website in another window

I've got all the content up except the links to the informance videos, and am working on html code for the whole

Alice: ah.

ah..

do you want me to sned you the youtube links here or email?

Mark: here is ok, I just need to know where the videos are to link them in the site =)

what I have thus far is here: <http://www.sfu.ca/~mcl5/projects/sfu/2011/summer/iat333/>

though I was thinking to use a blog tool instead - it would save time

still fiddling with the options =)

Alice: is there a index thing?

a blo thing should be ok

as long as it's professional looking

<http://www.youtube.com/user/alicelc1988?feature=mhee>

video channel

Mark: right now I just have the files there - in the final website I'll change it

I uploaded the cultural probe interview on thursday, its here: <http://www.youtube.com/watch?v=uO9x5Ft3kHw>

made it unsearchable to keep it as private as possible =)

thanks alice - got it =)

Alice: ahh..right! forgot about thatXD

the main task for next week's deliverables is the website..

and rough prototypes of our design?

Mark: lots of stuff actually, we need to make the site, 2 presentations (1min lec, 10min lab)

on the project so far, write reflections for each phase, decide what we will design and write a justification, then and come up with some (rough) design prototypes.

1 sec, I'll add the stuff to the working doc

Alice: adding it now

lol

Mark: 1 step ahead =)

lol

thanks alice

Alice: np

Mark: updated the links up above

Alice: awesome

Mark: <http://team55378008.blogspot.com/>

it seems we can play with the css scripts

so we may be able to play with it

pdf's and other files would have to be on the sfu webspace though, we can't upload them to blogger =(

Alice: yea..

that shouldn't be too bad

maybe include some "screenshots"

with the sfu download link

but have to change css to make it pro :P

lol

Mark: last project I did on blogger: <http://team-recurse.blogspot.com/>

not sure if that's the direction we want to take it in though

Alice: lets see

hm

not bad

Mark: its actually just one of the templates they have =)

Alice: yea..but it's a little too..blog-ish?

Mark: quite possible - any suggestions?

playing around with templates for the moment - who knows I might get lucky =)

Alice: hm..

if we are to use a template..we should modify it a bit

ol

that way, we won't be in an awkward position if a different team choses the same template

that said, i'm not very proficient with css :(

Mark: I'll play with it

making some fake posts in our blog so we can see how they will look

Alice: okays.

oh shit

we have to write stupid reflections...blhhah

Mark: we could always add you guys to the blog, and make the comments reflections

but you'd need a google account with your name declared

also, not sure if the reflections are personal or done as a team

Alice: i'm guessing team..?

oi..where's sha...:S

oh..are ou at schoo?

Alice has left.

Alice has opened the document.

Alice has left.

Alice has opened the document.

Alice: are you at shcool?

Shahanah has opened the document.

Shahanah: is the meeting still going on?

Mark: yep, we're still here

I'm playing with blogger to see if we could turn it into our website

and I put up all the docs I have thus far here: <http://www.sfu.ca/~mcl5/projects/sfu/2011/summer/iat333/>

Alice: his shahanahsss

*hi

deliverables/tasks for this week have been added to "week 9" in table of contents

Shahanah: ok

Alice: the website task is pretty straightforward

putting everything in a central location

we'll have to experiment/come up with some ideas for our speak to me bottle idea

Shahanah: are we going with the speak to me bottle as a initial idea?

Alice: i think so

anna seems to like the idea

that we're developing one of our probe items :)

Shahanah: oh okay cool then

Alice: but there isn't really much we can..prototype for that?

since it's just a bottle?

Shahanah: yeah..

hm

Alice: unless we take that concept and change the way it's used?

like maybe use osomething else to share the ideas anonymously

Shahanah: yeah

im just super confused if they want us to develop an idea based on a group persona i guess, or an individual one

Alice: and it'll make us different...

b/c most ppl are probabl going to be apps...news feed..blah blah

Shahanah: i think a lotta people are looking at individual prototyping

yeah

i dont see how else we can make it different than it already is, other than by digitalizing it some how

unless...we add or take away some of its purpose somehow..not sure though

Alice: eya..

hm..

the bulletin board may be easier to prototype..

Shahanah: yeah

but its seems super generic..

like it can be aimed at any social space

that needs to be more organized

Alice: agreed.

hm.

Shahanah: alright well

may be we should look for some precedents/inspirations
how we can develop the bottle idea
cause i think we have a initial idea for a prototype
which is the speak to me bottle
we just have to further develop it
with sketches etc.

i gotta head to bed soon though, i got get up at 330 for my shift
ill be online tomorrow and at school if we can meet

Alice: wow...early shiftttt

Shahanah: yeahhh

its been like that for the past couple of days..

ugh

burnt out by 9pm

Alice: aiyo :(

brutes...

lol

i cna meet online tomorrow

but yea, we should meet monday

Shahanah: brutes indeed!

lol

yeah i think we kind of have to meet monday..

unfortunately i can't meet tuesday i got work after my lab until 6

so ill be there all monday

i dont know if we have to document our ideas..

like brainstorming

but i still have our interview video..i can try to get stil pics off of that for the website

Mark: already uploaded the video - I'll include it =)

here is what the blog looks like as a start - any ideas on new looks? [http://](http://team55378008.blogspot.com/)

team55378008.blogspot.com/

Alice: tuesdays arent' the best day for me either..so monday i guess is best?

either before 12:30..

or after 1:30?

i prob wont be free before 12:30 monday b/c of 312..:(

um.it's ok

@mark

lol

the black solid textbox isn't really pleasing

Shahanah: yeah

the border is a little strong

but looks good so far

Alice: is it possible ot make it a little translucent?

the white

Shahanah: lol the opacity?

hey i gotta go cause im falling asleep lol! so ill be on the doc tomorrow at some point in the

afternoon

i guess we'll just meet at 12:30 on monday than?

Alice: lol.

okaysss

12:30 is 312..

you going ot lecture?

Shahanah: i hope so

lol

oh

sorry

1:30

Alice: maybe after

yea

1:30ish

mark, you free then?

not sure about serge's schedule..eh :S

Shahanah: in the mean time..ill look around for ideas/inspirations we can look at

i thought mondays were good with everybody?

Mark: yeah I'm ok at 1:30 ish =)

monday is always good for me after 11:15

Shahanah: alright im gonna go

Alice: okays..night shahanah :)

Shahanah has left.

Mark: well, I did a blue version

still tweaking lol

Alice: hm..

i think th eprevious one was better

with the black background with diagonal line things

the blue seems a little.."flat"

ol

*maybe b/c it is? DUH alice..lol..

Mark: because there is less distinction between fore and backgrounds =)

not black and white, blue & white

I could go darker, it would "pop" more

Alice: ehh..

can the opacity of the white boxes be adjusted?

Mark: it can be if needed

just did an update in black

yay css access! I can tweak lots of stuff =)

layout is somewhat constrained though

Alice: lol.

what happened toe the original original bckground?

lol

with somewhat..textures?

lol

Mark: I can get it back - its just a pain =)

will take me about 15min

Alice: lol.

yea...

i think that adds something more to the website

Mark: so this is a black standin =)

Alice: currently..it isn't very..appealing :(

lol.

anywhoo..i got to go now

time to closeee

Mark: ok

I'll add the background then go home =)

Alice: lol.

thankss..

:)

have a good night

Alice has left.
